

# OUR NEXT HUMANITARIANS

Our goal is a resilient and sustainable world, equipped for effective response to disasters.

From the world's most prestigious agencies to local grassroots action, in every part of the world, we're working to strengthen capacity to save lives, reduce risks, recover effectively, and uphold the rights and dignity of all those caught in disaster.

We're working to see fewer people lose their lives and livelihoods, fewer communities damaged and destroyed, and fewer inequalities exacerbating the struggle of those most vulnerable.

**We're working for a safer and more resilient world.**

**Will you join us?**

Email: [legacies@redr.org.uk](mailto:legacies@redr.org.uk)

**Our new legacy pack will give you all the information you need.**

Download your free legacy pack today at [www.redr.org.uk/legacy](http://www.redr.org.uk/legacy) or contact us for a printed copy.

As you consider these big decisions, we recognise that your will is, of course, a private and perhaps sensitive matter. We will keep anything you share with us strictly confidential. If you've included a gift to RedR UK in your will, please let us know so that we can thank you for your generosity.

## A CRITICAL MOMENT

## A FUTURE YOU CHOOSE

Your will expresses what really matters to you. It's the future you want to create.

After you've cared for loved ones closer to home, you may also want to provide for people facing the impacts of disasters, supporting them as they respond, recover, and rebuild.

**Can we help you leave behind a more sustainable and secure world?**

**A gift in your will can create life-saving capacity for future generations. Use it to stem the tide.**

While greenhouse gas emissions have reached an all-time high, the world is not yet taking the urgent action needed to avoid irreversible changes to our planet. Future generations will only face more frequent and increasing challenges.

**The stakes are high, and climate change not only poses a direct risk but also catalyses and intensifies other issues.**

## TRANSFORMATION FOR MONKHUSHI

Women, girls, and boys are fourteen times more at risk in disasters than men, disadvantaged by social circumstances. Climate change is also an equality crisis.

We're already working to meet this challenge with our Climate Change Adaptation and Disaster Risk Reduction work. We're integrating climate thinking across our programmes and scaling up our work to adapt to this urgent challenge.

Monkhushi is part of Akanful Women, a community-based organisation in Bangladesh. Where she lives, devastating droughts have become more frequent.

"There were six seasons before, and now we have twelve", she says. Water sources dry up, and water crises ensue.

The free training she received from RedR UK, however, changed everything. It gave

**her what she needed to transform her community.**

At the Climate Adaptation and Disaster Risk Reduction training, Monkhushi learnt how to produce biochar vermi-compost, a stable and natural way to store carbon, improve soil quality, and retain water. It's also an economic opportunity. "We can sell to farmers and market", she says.

**"We are now self-sufficient."**
